PHILOSOPHICAL MAGAZINE B, 2000, VOL. 80, NO. 12, 2175–2179

SUBJECT INDEX

Vol. 80

PAGE

α''-$Fe_{16}N_2$ giant moments?. 215
a-Si:H by plasma enhanced CVD 475
a-Si:H currents 29, 113
a-$Si_{1-x}C_x$:H preparation and properties 497, 539, 669
a-SiO_xN_y XPS 1857
a-Si:tritium 561
Ab-initio calculations of iron and its alloys 141
Ac response of thin-film superconductors 835
Acetylene on Si(111) 669
Actinide metals 53
Ag(In) and Y-211 in YBCO 1113
Ag–Ge molten alloy thermoelectric power calculation. 1727
$Al_{12}Mn$, $Al_{42}Mn_{13}$ and $Al_{54}Mn_{13}$ electronic structure 1681
Allometric scaling in evolutionary biology 1773
Andreev reflection in Al/Si/$In_xGa_{1-x}As$(001) junctions 817
Anthracene, quinoline, and acridine 13
Antireflection coatings for superconducting junctions 531
Atomic force microscopy of GaAs/AlAs multilayers 599
Au–n-type Si Schottky diodes with e-beam injection 1347

B-DNA electric charge distribution 1473
Ba–K–Bi–O superconductors 61
$Ba_{0.75}Sr_{0.25}TiO_3$ by sol–gel on Si(100) and quartz. 1153
$BaTiO_3$ thin films on silicon 395
Bi–Sr–Ca–Cu–O glass high-temperature conductivity 1093

Charge-conserving doping in high-T_c superconductors 1789
Charge ordering and stripes in high-T_c superconductors 1955
Co/Cr/Fe heterostructures 293
CoS_2 ferromagnetism 81
Cold atoms and quantum chaos, experiment. 2109
Columnar defect tracks for YBCO 865
Combinatorics and quantum graphics spectral statistics 1999
Composite fermions and quantum Hall systems 1405
Coordination defects in a-Si and a-Si:H, calculated 515
Cr thin film annealing. 623
Cr–p^+ a-Si:H devices 29
Critical current improvement by pulsed-laser deposition 45
Cryogenic light detectors 531
Crystallization kinetics model 1833
Cylindrical superconductor in a magnetic field 1455

de Haas–van Alphen effect in superconducting mixed state 307
Defects and annealing of He implanted in Si. 1975
Defects and DOS in amorphous silicon with tritium 561
Deposition, diffusion and aggregation (DDA) model 1299
Diborane doping in a-Si:H and a-SiC:H mobility edge 1317
Dichotomy between discrete and continuous systems 1773

Dielectric–conductor interface IR absorption 1219
Discharge-damaged silicon p–i–n photodiodes 799
DNA electric field in dielectric solvent 1473
DO_{22} disordering 1167

E_1 electron magnetic response in semiconductors 1943
Elastic moduli of Laves-phase materials 1667
Electrochemical breakdown in thin Nb_2O_5 films 1507
Electroluminescence in wide-bandgap a-Si:H 1811
Electron-beam-induced current in semiconductors 1347
Electron localization in superconducting Nb/Al 889
Electronic structure and magnetoelasticity 125
Er-doped silicon extended defects 571, 719
Exchange-spring magnets 247
Exotic superconductors from mixed-valence materials 1229

f-Electron localization 1179
Failure of bosonization for $d > 1$ 1599
Fe films on Ag and Cr 235
Fe phase stability and magnetic instabilities 127, 183
Fe spin reorientation 257, 275
$Fe_{16}N_2$ magnetism 215
$Fe_{72}Pt_{28}$ Invar alloy 155
$(Fe/Pd)_n$ multilayers 227
Ferroelectric and paraelectric phase of TGS 1193
Ferromagnetic junctions, properties 195
Ferromagnetic resonance for Fe-layer anisotropy 235
Film growth simulation with local interactions 507
Finite Fermi systems with chaotic excited states 2143
Flat magnetic Brillouin zone 1517
Flux dynamics in superconductor 1, 61
Fluxon motion in long Josephson array 857
Forces on atoms in a conductor 421
Forward scattering in d spatial dimensions, Fermi systems 1627
Fractional quantum Hall system on a Haldane sphere 1405

γ-Fe in the high-moment state 227
$Ga_{1-x}In_xN$ positron states calculation 1743
$GeSe_2$ glass, broken chemical order 1757
Germanium nanocrystals in amorphous SiO_2 729
Giant magnetoresistivity in metal layers 207

Haldane bosonization of fermions in d spatial dimensions 1599
Hard–soft magnetic heterostructures 247
Harmonic fields, quantum–classical correspondence 2057
Heat capacity and microstructure of Pd_3V 1167
Heisenberg model of thin ferromagnetic films 275
Helium implantation in Si 1975
Hg–Ba–Cu–O phase diagram 1083
High-pressure X-ray diffraction of an Invar alloy 155
High-temperature superconductor grain boundary model 827
Higher-order anharmonicity in Debye–Waller factor 1567
Hydrogen-implantation induced Si exfoliation 1921
Hydrogenated microcrystalline Si band splitting 1810

Ice spheres in a hydrocarbon emulsion 323
Invar and anti-Invar effects, calculations 141
Invar superlattices 293

Ionic sublimation of KBr single crystals 1653
Irradiated silicon detector recovery at 77 K 811
Island arrays in thin film deposition 1299

Josephson junction cubic array 897

Landau quantization in superconductors 307
Laughlin correlations 1405
Lazarus effect, recovery of CCE by cooling 811
Light-beam-induced currents in silicon wafers 579
Lindemann melting rule use 53
Luminescence in Er-doped Si made by LPE 571
Luminescence in rare-earth ions in Si and SiO_2 719
Luminescence in $Si_{1-x}C_x$ thin layers 669
Luminescence in a-SiO_xN_y and short-range order 1857
Luminescence in quantum confinement 679

Magnetic-field induced two-dimensional lattice 1893
Magnetization of superconductors 61
Magnetization reversal in wires. 207
Magnetoelastic waves in amorphous ferromagnets 1903
Magnetoelasticity of itinerant magnets 81
Magnetoelasticity of transition metal alloys, proceedings 125ff
Many-body quantum transport theory 1359
Martensitic kinetics in magnetic fields at high pressure 171
Martensitic phase transitions by mean-field calculation 165
Martensitic phase transitions by molecular dynamics 183
Melting of the light actinides 53
Metal–polymer composites. 23
Metallic cluster coalescence 95
Meyer–Neldel rule example 113, 561
Microcrystalline p–i–n device inhomogeneous transport 755
Microcrystalline silicon 459
Microscopic model of structural phase transitions 165
Microwave experiments on localization and tunnelling 2129
MoRe superconducting alloys 1393
Modulated photocurrent spectroscopy 547
Molecular dynamics of cluster coalescence 95
Multiple-internal-reflections in silicon wafers. 579

$Na_{0.5}Bi_{0.5}TiO_3$ and in $BaTiO_3$ electronic structure 1141
Nagy local effect exchange. 409
Nanoparticles from ion implantation 23
Nanoscale electrical conductors 421
Nb-doped $CaTiO_3$ quantum chemical studies 1499
Nb thin film roughness 1133
$Nb/Ni_{80}Fe_{20}$ film critical current behaviour 1127
Nb_2O_5 growth in acid medium 1507
Near-field optical investigation of porous silicon 611
Near-infrared photodetectors from Ge on Si(100) 791
Near-surface microstructure of TiO_2 under irradiation 1947
Ni_3Fe nanocrystals 1545
Nucleation of recrystallization in 2D vertex simulation 1987

Optimized effective potential method 409
Oxidation of silicon carbide 647, 661

π-Electronic structure of doped molecules 13

$P - T$ phase diagram of iron, theory . . . 127
Pd_3V, ordered and disordered . . . 1167
Phonon-induced stripe formation . . . 1955
Photoluminescence of amorphous silicon alloys . . . 741, 1811
Photoluminescence of Ge in a-SiO_2 . . . 729, 741
Plasma-enhanced CVD for amorphous SiC:H . . . 539
Plutonium vibrational order . . . 1869
Point charge in piezoelectric media . . . 331
Porous silicon nonlinear refraction . . . 587
Porous silicon optical devices . . . 705
Porous silicon partially oxidized for quantum confinement . . . 679
Porous silicon transport, pea-pod model . . . 691
Porous silicon-based LED . . . 611
Position-sensitive detectors from a-Si . . . 765
Precipitation of nuclei from undercooled liquid . . . 1833
Pressure melting of ice in an emulsion . . . 323
Proposed large cell for semiconducting (Na–Bi–Ba)TiO_3 . . . 1141
Pseudogap in icosahedral and glue atoms . . . 1681
$Pu_{0.98}Ga_{0.02}$ vibrational order . . . 1869
Pulsed-excitation transient photoconductivity . . . 1705

Quantum and classical chaos, proceedings . . . 1997ff
Quantum chaos in atom optics . . . 2023
Quantum transport equations for semiconductors . . . 1359
Quantum well infrared photodetectors . . . 775

$R_{1-2x}Ca_xTh_xBaSrCu_3O_{7-\delta}$ properties (R = Eu or Dy) . . . 1789
Random-matrix theories in quantum and classical chaos . . . 2119
Rare-earth sulphide electronic structure . . . 1179
RF impedance of YBCO epitaxial films . . . 1961
Rutile TiO_2 single crystal under heavy-ion irradiation . . . 1947

Scanning probe microscopy of niobium films . . . 1133
Shapiro steps in a periodic pinning potential . . . 847
Si on GaAs(001) TEM of growth under excess As or Al . . . 1055
Si/SiO_2 quantum wells . . . 705
SiC on Si(111) from C_{60} precursors . . . 635
SiC (6H) amorphization by Ar^+ . . . 647, 661
SiH_4–CH_4 and SiF_4–CH_4 films . . . 487
SiO_x evaporated films . . . 523
Silicon-based thin films . . . 487
Site distributions in lead zirconate titanate (PZT) . . . 1585
Sm–Ba–Cu–O buffer layers . . . 45
SnS_x and $Li_{0.57}SnS_2$ electronic structure . . . 1933
Space charge limited currents . . . 113
Spin-polarized tunnelling in ferromagnetic junctions . . . 195
Spontaneous dimer order in Heisenberg model . . . 1483
Spray pyrolysis for Si-based photodetectors . . . 781
SQUID-based magnetic microscope . . . 929
Staebler–Wronski effect in Li-doped a-Si:H . . . 1327
STM on homoepitaxial Fe films . . . 283
Structural origin of broken chemical order in glass . . . 1757
Structural relaxation in grains in nanocrystalline Ni_3Fe . . . 1545
Superconducting astronomical radiation detectors . . . 919
Superconducting peak effect in mixed state . . . 1393
Superconductor surfaces by AFM . . . 599
Superconductors for CERN Large Hadron Collider . . . 907
Supercurrent decay with renormalization group model . . . 1311

Supersonic, hyperthermal fullerene beam 635
Suppression of dHvA in superconducting mixed state 307
Surface-barrier Si-based photodetectors 781

TaV_2, $TaV_2H(D)_x$ and $ZrCr_2$ elastic moduli 1667
Tb/Fe multilayers 257
Thermal driving forces in critical-current distributions 1555
Thin films of a-Si:H 475
Third-order nonlinear refraction in porous silicon 587
Thermopower of liquid silver–germanium alloys 1727
Ti_2CS electronic structure 379
Tilted reverse-biased p–n junctions on a finite substrate 1071
Transformations in Fe–Ni, Cu–Al–Ni, and Fe–Ni–Mn alloys 171
Transient photocurrent of amorphous semiconductors 547
Transport in semiconducting $Bi_4Sr_3Ca_3Cu_4O_x$ 361
Two-dimensional frustrated Heisenberg antiferromagnet 1483
Two-phonon lattice modes at interface 1219

UX_2 (X = Bi, Sb, As, and P) single-crystal growth 1517
Ultrasmall superconducting grain thermodynamics 883
Ultrasonic investigation of triglycine sulphate 1193
Uranium dipnictides Fermi surface 1517

Vacancy formation energies in potassium bromide 1653
Valence fluctuation pairing 1229
Variable range hopping in oxide semiconductor 361
Vortex–antivortex pair formation in superconductors 1311
Vortex lattice melting in perforated Nb/(Cu–Mn) 875
Vortices motion in a three-dimensional superconductor 1455

Wave propagation in disordered media 2087

X-ray reflectivity on thin films of chromium 623

Y–Ba–Cu–O films from organics 1105
Y–Ba–Cu–O superconductors 1, 45

Zincblende composition dependence of positron states 1743

PHILOSOPHICAL MAGAZINE B, 2000, VOL. 80, NO. 12, 2181–2197
